at PIEDMONT EQUINE

POST SURGICAL GUIDELINES FOR ROUTINE DENTALS

Your pet is ready to go home!

- ❖ Once home, allow pet to continue recovery in a warm, quiet, comfortable place. Keep separated from other pets and small children. Each pet will recover at his or her own pace.
- ❖ Patients that have received general anesthesia may experience some degree of stomach upset. As a preventative, please:
 - Offer small amounts of water at a time
 - Offer small amounts of pet's regular diet at a time
- ❖ Leash walk for 1-2 days post procedure, including potty breaks.
- ❖ Rest is essential for a healthy recovery.
- ❖ You may start tooth brushing or oral hygiene products starting 5-7 days post procedure. We recommend and carry dental products bearing the VOHC label, which ensures the product has undergone and has passed clinical testing that fulfill product claims.

Please feel free to contact us at **540-364-4954** if you have any questions or concerns.

Our goal is a smooth and uneventful recovery!
